Joshua Katz

(828)545-0560 Asheville, NC joshua.samuel.katz@gmail.com
github.com/joshuaskatz linkedin.com/in/joshua-katz-043596159

LANGUAGES

Proficient: JavaScript, TypeScript, HTML/CSS, SQL

Familiar: Python, GO

TECHNOLOGIES

Proficient: ReactJS, GraphQL, Node.js, PostgreSQL, Sequelize, TypeORM, Git, Bootstrap, Jest, REST API

Familiar: Prisma, MongoDB, Mongoose, jQuery, Storybook, Github Actions

EDUCATION

8/2013 - 5/2017

B.S. in Chemistry, Minor in Math

UNC Asheville

- Undergraduate Research Scholar
- Departmental Distinction in Chemistry

RESEARCH EXPERIENCE

4/2015 - 5/2017

UNC Asheville, Department of Chemistry

- "Synthesis and antibiotic evaluation of heterocyclic A and C ring depsidone analogs."
- Optimized synthetic routes for heterocyclic depsidone analogs, to test against Gram-positive and Gram-negative antibacterial assays

REFERENCES

Branden Mountain

Lead Brewer, Asheville Brewing Company

PROJECTS

Song Rex - TypeScript

https://www.s-rex.io

Users can log in using their Spotify account through a Passport authorization flow, and generate playlists based off of their top played songs. This project uses PostgreSQL as the database, with a REST API and Express server. The front-end was styled using React-Bootstrap and SCSS.

Technologies used: React, React-Bootstrap, REST API, TypeORM, Passport, Jest

Chat App Server - TypeScript

https://www.github.com/joshuaskatz/chat-app-server

This is a GraphQL API with social media functionality. It allows for sending, accepting, and deleting friend requests, as well as private messaging other users on your friends list in chatroom's where multiple users can connect. This project uses PostgreSQL as the database.

Technologies used: Type-GraphQL, TypeORM - used Raw SQL, Jest

Share Our Water - JavaScript

https://share-our-water.herokuapp.com/

This is a fishing log where users can enter and track their fishing trips, as well as their tackle, in an organized fashion. You can also view all rivers logged in the database on comprehensive map. This project uses PostgreSQL as the database. An alternate backend was created using GraphQL and Sequelize.

Technologies used: React, Bootstrap, GraphQL, Apollo, Prisma, MapBox, Jest

WORK EXPERIENCE

7/2017 - 3/2020

Brewer

Asheville Brewing Company

- Brewed on a 7bbl and 15bbl brewhouse system.
- Performed filters and dry hopping in both limited run and production breweries.
- Created SOP for aseptic inoculation of yeast on agar slants and plates, as well as general aseptic lab techniques for handling/propagating yeast.

8/2016 - 12/2016

Drop-In Chemistry Tutor

UNC Asheville

8/2015 - 12/2015

Organic Chemistry Lab Teacher's Assistant

UNC Asheville
